2016

CORE SKILLS

Network Design

Cisco IOS

MikroTik RouterOS

Ubiquiti UniFi

Fortinet

Fiber Optic

Firewalls & VPN

SAM SALAMEH

Senior Network Engineer

Executive Summary

Accomplished Network Engineer with **15+ years** of progressive experience designing, implementing, configuring, and troubleshooting enterprise-grade networking infrastructure. Proven expertise in managing complex network environments, optimizing performance, and ensuring high availability across diverse platforms including Cisco, MikroTik, Ubiquiti, and Fortinet.

Strong background in fiber optic installations, VPN configurations, firewall management, and traffic analysis. Demonstrated ability to lead technical projects, mentor junior engineers, and deliver solutions that drive business growth while maintaining strict security standards.

Key Achievements

- ✓ **OPERATIONS LIFECYCLE:** Proven expertise in managing high-volume network deployments, infrastructure upgrades, and system migrations with 100% uptime maintenance.
- ✓ **SERVICE & RETENTION:** A track record of resolving 50+ daily complex technical issues while maintaining strict SLA compliance and customer satisfaction.
- ✓ **WORKFLOW OPTIMIZATION:** Experience in standardizing network configurations and operational procedures to significantly reduce deployment time and overhead.

Professional Experience

Freelance Network Engineer

2023 - Present

 Freelance, Beirut

Providing comprehensive network engineering services to diverse clients including enterprise businesses, ISPs, and educational institutions. Specializing in network design, implementation, troubleshooting, and optimization across multiple vendor platforms.

- ▶ Designed and deployed enterprise-grade networks for 20+ clients
- ▶ Implemented secure VPN solutions and firewall configurations
- ▶ Conducted network audits and performance optimization
- ▶ Provided 24/7 technical support and emergency response

Network Management Consultant

2021 - 2023

 Freelance, Beirut

Consulted with organizations on network infrastructure planning, security implementations, and technology upgrades. Delivered strategic recommendations and hands-on technical solutions.

- ▶ Managed network infrastructure for multiple concurrent projects
- ▶ Implemented advanced routing protocols (OSPF, BGP, EIGRP)
- ▶ Configured and maintained enterprise firewalls and security systems

- ▶ Trained technical teams on best practices and new technologies

Networking Technician

2010 - 2023

📍 Professional Network, Beirut

Provided comprehensive networking support including installation, configuration, maintenance, and troubleshooting of network equipment and infrastructure.

- ▶ Installed and configured routers, switches, and wireless access points
- ▶ Performed fiber optic cable installations and terminations
- ▶ Monitored network performance and resolved connectivity issues
- ▶ Maintained detailed documentation of network configurations

Technical Expertise

Networking

TCP/IP, VLAN, Routing & Switching, QoS, Network Security

Platforms

Cisco IOS, MikroTik RouterOS, Ubiquiti UniFi, Fortinet FortiGate

Infrastructure

Fiber Optic, Structured Cabling, Wireless Networks

Security

Firewalls, VPN (IPSec, SSL), Access Control, Intrusion Detection

Tools

Wireshark, SolarWinds,
PRTG, Nagios, Cacti
